Life is a movement toward the goal of mastery. An evolutionary program impels the advancement, improvement and mastery of ourselves and our talents. The supreme endeavor of progress is to cause every man and every woman to become Adepts in the art of spiritual advancement and the use of spiritual powers.

The treasures in knowledge these Masters gathered through previous experiences and toil are the inheritance given younger souls still striving for wisdom and self control. The Benefactors, themselves, dispense their jewels; and their distributions cover an era of many centuries.

The Group of Adepts who return their harvest to humanity are known as the Directors. They remain in inner communication with the Earth, guiding its advancement in art, education, science, art and religion.

A master is one who has reached
to mastery of Nature's Laws and Forces
and who belongs to certain Degrees
of the Cosmic Lodge. To this state
of being is man ever striving for.
The mastery of life. Through all
the pains and joys, the lessons and
services of life man goes through.
Learning and growing and thus
becoming the master of himself.
This is the master we strive to
become one with and to know. The
master within each one of us.

Jesus said "call not man your
master.", and this is so true, for
no man, no matter how high
he is spiritually nor how much he
helps you, can be called "my Master".
A master is but a Wayshower along
the Great Path, with Life as the
Great Teacher. All a master can do
is to point out the steps, endeavor to show
the disciple how he can obtain the
spiritual nourishment he will require
on his journey and give him a staff.

of knowledge to enable him to protect
himself from the antagonistic forces
he will inevitably meet on the way.
Then he must draw in and await
the results. All the rest depend
upon the individual man.
